

SONANCE
VISUAL PERFORMANCE

SONANCE VISUAL PERFORMANCE SERIES PLEASING THE EYE AS WELL AS THE EAR

More than 25 years after Sonance invented the in-wall speaker, we continue to find new ways to change the way the world looks at audio.

Sonance Visual Performance® Series speakers uphold our tradition of blending legendary acoustic performance with industry-leading aesthetic appeal.

Unlike conventional in-wall and in-ceiling speakers—which tend to draw unwanted attention with wide flanges and prominent grilles—Sonance Visual Performance Series speakers provide a subtle complement to any space.

The elegantly designed grilles feature just 0.2 inches of trim. They attach magnetically to the speakers and can be painted in a single step to match surrounding surfaces.

The result is an approach to home and commercial audio that goes beyond the ordinary, providing unsurpassed audio performance while striking the perfect visual note.

VISUAL PERFORMANCE Providing Options to Suit Any Preference in Any Environment

AUDIO QUALITY

Sonance Visual Performance Series speakers deliver renowned Sonance audio quality in five performance levels.

Level 9: Beryllium composite drivers with pivoting tweeters produce reference quality sound and create the acoustic standard by which all others are measured.

Level 7: Coated carbon fiber drivers and pivoting aluminum tweeters ensure audiophile quality sound reproduction designed to please discriminating listeners.

Level 5: Carbon fiber drivers and pivoting silk tweeters deliver superb audio performance.

Level 3: Polypropylene drivers and pivoting silk tweeters ensure great reproduction and provide installation flexibility.

Level 1: Polypropylene drivers and silk tweeters produce quality sound and offer very good value.

SHAPE AND SIZE

Sonance Visual Performance speakers are available in three shapes—rectangle, round, and square—to provide the ideal complement to lighting fixtures, interior décor, and even the design of the room itself.

Each shape is available in three sizes: large (featuring an 8" woofer), medium (6.5" woofer), and small (4" woofer). All five performance levels are offered in medium speakers; large speakers are available in performance levels 5, 7, or 9; and small speakers are available in performance levels 1, 5, or 9.

SPECIALTY SPEAKERS

Sonance ThinLine™ speakers (TL):

For shallow installations, choose Sonance ThinLine speakers, available in three medium-size shapes: rectangle, round, and square.

Sonance Single Stereo Technology® speakers (SST):

Combining the left and right signals in one unit, Sonance SST speakers provide an ideal solution for alcoves, hallways, bathrooms, and other small areas.

Sonance Single-Stereo Technology ThinLine speakers (SST TL):

Combining the best of two Sonance designs, providing a perfect solution to shallow installations in small areas.

Sonance Visual Performance Extreme speakers (XT):

Engineered to handle high humidity, extreme temperatures, and even the occasional shock, these speakers provide an outstanding solution for outdoor areas and marine applications.

Sonance Visual Performance Commercial In-Ceiling Speaker (VP81R C, VP81S C):

Provides the elegant, modern aesthetic of Visual Performance in a speaker ideal for commercial environments. Available in round or square, these speakers carry the following certifications: UL1480, UL2043, NFPA-70, NFPA-90A (United States); CAN/ULC S541, CAN/ULC/ORD C2043 (Canada).

HOME THEATER

Sonance Left-Center-Right speakers (LCR):

Incorporating all three channels in a single rectangle design, these speakers perfectly complement the look of flat-panel screens.

Sonance Surround speakers (SUR):

A precisely mounted tweeter array creates a diffuse sound field that's ideal for surround channel applications.

BASS AUGMENTATION

Sonance Visual Performance Series Woofers (W):

Rectangle, round, and square finish components maintain visual continuity with other Visual Performance speakers while enhancing bass performance. They are powered by the Sonamp A800 amplifier, available separately.

Sonance Visual Performance Series Bandpass Subwoofer (BPS-1) and Bandpass Connector (VP4R BPC, VP4S BPC, VP6R BPC, VP6S BPC):

Our unique bandpass subwoofer adds deep, powerful bass to any audio system. Sound is delivered through the Bandpass Connector—available in round or square, small (4") and medium (6") sizes—which includes a magnetically attached grille featuring the Visual Performance aesthetic that blends perfectly with the Visual Performance speakers installed in the room or throughout the home.

ACCESSORIES

- Sonance completes the picture with a variety of accessories to ease installation and improve sound quality.
- Flex Brackets and Staple Brackets provide a plastic template for new construction installation.
 - Acoustic Enclosures and Retrofit Enclosures provide the finest sonic performance while preventing sound spillover to adjacent spaces.
 - Fire-rated Backcans can be used as a component to achieve a one-hour rating in accordance with various ASTM and UL safety tests.
